## EFFICIENCY AND PERFORMANCE

New Renault MEGANE R.S. 300 TROPHY benefits from all the innovations introduced with Megane R.S. such as the 4CONTROL four-wheel steering system.

### 1. Suspension with hydraulic compression stops:

Borrowed from the demanding world of rallying, hydraulic compression stops on the Megane R.S. are added to each shock absorber to dampen the bump before they reach full compression. This avoids any rebound and pendulum effects, helping to keep each tyre in contact with the ground to produce notable improvement, whatever the road throws at you.

### 2. Torsen® mechanical limited slip differential:

Associated with the Cup chassis, it has an asymmetrical transfer rate for acceleration and deceleration to improve acceleration power and cornering speed.

## MORE POWER

New Renault Megane R.S. 300 TROPHY introduces a new version of the 1.8L turbo engine, driven by a 300PS power unit. Power gains are thanks to development in the turbo and exhaust, notably benefiting from technology pulled directly from Formula 1®.

Turbo with ceramic ball bearings

The turbocharger's turbine is now mounted on ceramic ball bearings, for shorter response time.

Valve exhaust system

The dual sound exhaust valve system contributes to maximizing engine performance. A valve system - actuated automatically depending on the driving mode selected via the R.S. Drive - offers a double sound. The position of the valve, controlled by the R.S. Drive mode, the engine speed and load, provides two tones: when open, the valve causes reduced flow resistance, enabling the gases to be routed along a more direct path. This allows the engine's sporty and acoustic potential to be fully expressed.

## AGILITY AND STABILITY

4CONTROL technology contributes to incisive steering and optimised roadholding for a precise, surefooted drive. At low speeds, the system turns the rear wheels in the opposite direction to the front wheels. At speeds of over 60 km/h (100 km/h in Race mode), all four wheels turn in the same direction. You are in control of the roads.
